REQUEST
PROPOSAL

We are writing to propose a comprehensive Penetration Test to help you identify vulnerabilities and strengthen your overall cybersecurity posture.

Purpose:

To improve security of Battle State Games by looking for weaknesses within the company. This will be done by security professionals within WCTC performing security penetration. On completion of the penetration test security will be pushed to greatly improve thus resulting in a more secure system. Without a penetration test vulnerability will be left easily exploitable.

Scope:

External Network Testing: We will assess your network perimeter to identify vulnerabilities that could be exploited by external attackers.

Application Testing: We will test your web applications for vulnerabilities

Social Engineering: We will conduct a variety of social engineering tests to evaluate the effectiveness of your security awareness training program and identify potential weaknesses.

Results

Our testing approach will follow industry-standard methodologies, including the Open Web Application Security Project (OWASP) Top 10 and the National Institute of Standards and Technology (NIST) Cybersecurity Framework.

Upon completion of the testing, we will provide you with a detailed report outlining our findings, including an executive summary, a technical overview, and recommendations for remediation. We will also conduct a debriefing session with your team to ensure that you fully understand the findings and the recommended actions.

We believe that a Penetration Test is a critical component of any comprehensive cybersecurity program. It provides valuable insights into your organization's vulnerabilities and can help you prioritize your security investments. We look forward to working with you to strengthen your security posture and protect your critical assets.

proposed costs

Penetration Test project would be as follows:

- Associate bill rate: $125/hr
- Senior bill rate: $250/hr
- Total number of hours: 40

The cost breakdown would be as follows:

- Associate hours: 20 hours x $125/hr = $2,500
- Senior hours: 20 hours x $250/hr = $5,000

Total Cost = $2,500 + $5,000 = $7,500

Please note that this is an estimate based on the information provided, and actual costs may vary depending on the specific scope of the project and any additional requirements or expenses that may arise.

VULEM

THANK YOU

for considering our proposal for a Penetration Test. We appreciate the opportunity to work with you and help strengthen your organization's cybersecurity posture.
